

### North Carolina Department of Revenue

Roy Cooper Governor Ronald G. Penny Secretary

### **MEMORANDUM**

- From: Tony Simpson Director, Local Government Division
- Date: December 6, 2018
- Re: 2019 Cost Index and Depreciation Schedules

Attached you will find the 2019 Cost Index and Depreciation Schedules. The document is also located online at <u>https://www.ncdor.gov/documents/2019-cost-index-and-depreciation-schedules</u>.

We recommend the use of these schedules in the valuation of business personal property and certain taxable personal property listed as of January 1, 2019.

There were a few minor changes this year, other than the usual percent good factor adjustments. These changes are for appraisals as of January 1, 2019, and forward, and are not retroactive. The changes have been marked with an asterisk in the Cost Index and are as follows:

- 1. On Index page 1, under the category *Amusement and Recreation Equipment*, we added internet sweepstakes and video poker machines with a B-5 recommended schedule. Also under this category, amusement rides and games, mobile gaming units, and music machines were relocated from the previous category of *Vending Equipment*, with a B-5 recommended schedule.
- 2. On Index page 2, under the category *Automobile Repair and Service Equipment*, we have added electric vehicle charging stations with a J-8 recommended schedule.
- 3. On Index page 5, the category *Copying and Printing Equipment* replaced the previous category *Copying and Duplicating Equipment*. The descriptions have been simplified and all equipment was placed on a U-5 recommended schedule, with the exception of industrial/commercial 3-D printers on an A-11 recommended schedule.

501 N. Wilmington Street, Raleigh, NC 27640 PO Box 871, Raleigh NC 27602-0871 Website: www.ncdor.gov An Equal Opportunity Employer

- 4. On Index page 5, under the category *Data Processing Equipment*, we updated the description to include smartboards.
- 5. On Index page 5, the category *Drones* was added with a B-5 recommended schedule.
- 6. On Index page 6, under the category *Dry Cleaning and Laundry Equipment*, we updated the description for coin operated machines.
- 7. On Index page 7, under the category *Farm and Ranch Machinery and Equipment*, we have updated the description and placed all equipment on an A-10 schedule with a 25% residual.

Important! Per Session Law 2018-113, NC Farm Act of 2018, counties are <u>required</u> to use the A-10 schedule and 25% residual if valuing equipment in this category using the cost approach. (If additional depreciation is warranted, the county appraiser may value below the 25% residual.) This law is in effect for the 2019 tax listings.

- 8. On Index page 9, under the category *Leased Office Business Machines*, the description was simplified and all equipment was placed on an S-5 recommended schedule.
- 9. On Index page 9, the category *Medical Equipment* was added. This category includes the previous category of *Hospital and Nursing Home Equipment* and the description was updated to include medical, dental, veterinarian, laboratory and pharmaceutical equipment.
- 10. On Index page 12, under the category *Rental Equipment*, the description was simplified and all equipment was placed on a P-5 recommended schedule.
- 11. On Index page 12, under the category *Restaurant, Bar and Soda Fountain Equipment*, we updated the description to include equipment installed on food trucks.
- 12. On Index page 15, under the category *Vending Equipment*, the description was simplified and all equipment was placed on an O-6 recommended schedule.

Reminder(s):

1. Schedule N shows a straight-line schedule that depreciates down to zero, for illustrative purposes. However, you should always use a 25% residual when applying Schedule N unless you have analyzed a particular situation and decided to do otherwise.

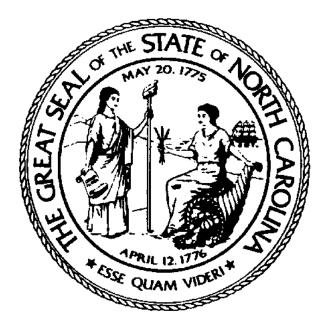

In 2005, the North Carolina Court of Appeals affirmed the North Carolina Property Tax Commission's decision in the matter of the appeal of Westmoreland—LG&E Partners from the decision of the Halifax County Board of Commissioners for the tax years 1996-2001. In its decision, the North Carolina Court of Appeals opinion quoted excerpts from the Property Tax Commission's decision. The opinion quotes, "The Tax Administrator properly applied the Cost Index and Depreciation Schedules developed by the North Carolina Department of Revenue..."

correct." This and other previous cases have solidified our opinion that, when used properly, the Cost Index and Depreciation Schedules are well accepted by the Courts.

These schedules have been prepared by this office as a general guide to be used in the valuation of business personal property, utilizing the replacement cost approach to value. It is important to remember that the schedules are only a guide. There may be situations where the appraiser will need to make adjustments for additional, or less, functional or economic obsolescence; or for other factors.

These schedules are provided to aid in the overall uniformity and equity of property tax assessment practices, as required by North Carolina statutes. If you have any questions about these schedules, please contact the Personal Property Section at (919) 814-1129.

North Carolina Department of Revenue Local Government Division Property Tax Section

Following this introduction is the 2019 Cost Index and Depreciation Schedules for use in valuation of business personal property located in North Carolina. One of the most effective and efficient methods for determining current <u>Replacement Cost New Less Depreciation</u> is the use of these valuation tables. These tables are published by the Property Tax Section solely to assist the business personal property appraiser in determining current market value.

All life years used on the different types of property have been carefully researched with federal tax guides, other state government depreciation schedules, as well as information provided to us by the taxpayers themselves. The trend factors are determined using the percentage price increase or decrease over the past year of similar business markets. These percentages come from the latest edition of <u>Producer Price Indexes</u>, as determined by the U.S. Department of Labor, Bureau of Labor Statistics.

In using these trending schedules, you will be utilizing the cost approach to value. In using the cost approach, the appraiser must determine four critical elements:

- 1. The original (historical) installed cost
- 2. The current replacement cost new (RCN)
- 3. The useful economic life of the property
- 4. The loss in value (Depreciation)

When applying the schedules, always use original (historical) cost which includes all costs involved with bringing the property into operation. As an example, consider the following:

On their 2019 business listing, a manufacturer of machinery listed \$10,000 in machinery and equipment, acquired in 2012. This amount correctly included \$8,000 actual equipment, \$1,500 installation, and \$500 freight and taxes. Using schedule A, with a suggested useful life of 10 years, we note that the appraised market value as of January 1, 2019 would be:

\$10,000 x .33 = \$3,300

In examining what we have done, the trending factor of 1.10 brings the value of the equipment up to current replacement cost new, which would be:

\$10,000 x 1.10 = \$11,000

Then we depreciate RCN assuming the property is seven years old with a suggested ten-year life and therefore has three years remaining in its useful economic life:

11,000 x .30 = 3,300, is the same answer as above.

The valuation tables show percent good factors (.33) which are simply the products of the trending factors (1.10) and the straight-line depreciation factors (.30). These percent good factors are used to find current replacement cost new less depreciation. It is **very important** to remember that in using the trending schedules, you do not apply the trend factor a second time as it has already been used in the calculation of the percent good factor.

HOTEL, MOTEL AND RESORT EQUIPMENT Televisions		D B	10 5
LANDSCAPING EQUIPMENT	16	А	8

#### IDLE EQUIPMENT

Equipment that has been taken off production status on a permanent basis is considered to be idle equipment. This classification should not be confused with equipment that is temporarily idle due to not yet being placed into production (CIP), a downturn in the economy, seasonal production, routine maintenance, etc. Although we recommend in most cases that some additional depreciation adjustment be made to verified idle equipment, there is no firm guideline as to what adjustment should be made to determine the final value.

In determining the amount of adjustment, the county appraiser must review each situation, taking into account all the factors affecting the property such as age, condition, past and future uses, marketability, remaining life, and reasons for the equipment being idle.

INSTRUMENTS (PROFESSIONAL, SCIENTIFIC &		
CONTROLLING, PHOTOGRAPHIC AND OPTICAL,		
WATCHES AND CLOCKS)	В	12
Includes establishments in manufacturing scientific and		
research instruments such as meters - gas, liquid, tallying		
and measuring; optical elements and assemblies, hearing		
aids, hearing test equipment, wheel chairs, prosthetic		
devices, contact lenses, photographic accessories, data		
cameras, watches and clocks.
