## MEMORANDUM

To: Users of the Cost Index and Depreciation Schedules
From: Tony Simpson, Local Government Division Director
Date: November 19, 2019
Re: 2020 Cost Index and Depreciation Schedules
Attached you will find the 2020 Cost Index and Depreciation Schedules. The document is also located online at https://www.ncdor.gov/cost-index-and-depreciation-schedules.

We recommend the use of these schedules in the valuation of business personal property and certain taxable personal property listed as of January 1, 2020.

There were a few minor changes this year, other than the usual percent good factor adjustments. These changes are for appraisals as of January 1, 2020, and forward, and are not retroactive. The changes have been marked with an asterisk in the Cost Index and are as follows:

1. On Index page 5, under the category Copying and Printing Equipment, we updated the description to clarify the inclusion of leased copying and printing equipment. * See note!
2. On Index page 9, the title for the former category Machinery (Machine Shops) was changed to Machinery and Manufacturing.
3. On Index page 11, the title for the former category Petroleum Products Manufacturing Equipment was changed to Petroleum Products Manufacturing.

Reminder(s):

1. Schedule N shows a straight-line schedule that depreciates down to zero, for illustrative purposes. However, you should always use a $25 \%$ residual when applying Schedule N unless you have analyzed a particular situation and decided to do otherwise.
2. Per Session Law 2018-113, NC Farm Act of 2018, counties are required to use the A-10 schedule and $25 \%$ residual if valuing equipment under the Farm and Ranch Machinery and Equipment category using the cost approach. (If additional depreciation is warranted, the county appraiser may value below the $25 \%$ residual.)

In 2005, the North Carolina Court of Appeals affirmed the North Carolina Property Tax Commission's decision in the matter of the appeal of Westmoreland-LG\&E Partners from the decision of the Halifax County Board of Commissioners for the tax years 1996-2001. In its decision, the North Carolina Court of Appeals opinion quoted excerpts from the Property Tax Commission's decision. The opinion quotes, "The Tax Administrator properly applied the Cost Index and Depreciation Schedules developed by the North Carolina Department of Revenue..." The Court also writes, "It is well-settled in this State that ad valorem tax assessments are presumed correct." This and other previous cases have solidified our opinion that, when used properly, the Cost Index and Depreciation Schedules are well accepted by the Courts.

These schedules have been prepared by this office as a general guide to be used in the valuation of business personal property, utilizing the replacement cost approach to value. It is important to remember that the schedules are only a guide. There may be situations where the appraiser will need to make adjustments for additional, or less, functional or economic obsolescence; or for other factors.

These schedules are provided to aid in the overall uniformity and equity of property tax assessment practices, as required by North Carolina statutes. If you have any questions about these schedules, please contact the Personal Property Section at (919) 814-1129.

Note: The description under Copying and Printing Equipment on Index Page 5 was corrected on November 25, 2019. Mailing and postage machines were duplicated in the Cost Index and included in this category description in error. They remain under the Office Furniture, Fixtures, Machines and Equipment category on Index Page 10, with the appropriate schedule being K-10.

## $\underline{2020}$ Cost Index \& Depreciation Schedules

North Carolina Department of Revenue<br>Local Government Division<br>Property Tax Section

Following this introduction is the 2020 Cost Index and Depreciation Schedules for use in valuation of business personal property located in North Carolina. One of the most effective and efficient methods for determining current Replacement Cost New Less Depreciation is the use of these valuation tables. These tables are published by the Property Tax Section solely to assist the business personal property appraiser in determining current market value.

All life years used on the different types of property have been carefully researched with federal tax guides, other state government depreciation schedules, as well as information provided to us by the taxpayers themselves. The trend factors are determined using the percentage price increase or decrease over the past year of similar business markets. These percentages come from the latest edition of Producer Price Indexes, as determined by the U.S. Department of Labor, Bureau of Labor Statistics.

In using these trending schedules, you will be utilizing the cost approach to value. In using the cost approach, the appraiser must determine four critical elements:

1. The original (historical) installed cost
2. The current replacement cost new (RCN)
3. The useful economic life of the property
4. The loss in value (Depreciation)

When applying the schedules, always use original (historical) cost which includes all costs involved with bringing the property into operation. As an example, consider the following:

On their 2020 business listing, a manufacturer of machinery listed $\$ 10,000$ in machinery and equipment, acquired in 2013. This amount correctly included $\$ 8,000$ actual equipment, $\$ 1,500$ installation, and $\$ 500$ freight and taxes. Using schedule A, with a suggested useful life of 10 years, we note that the appraised market value as of January 1, 2020 would be:

$$
\$ 10,000 \times .33=\$ 3,300
$$

In examining what we have done, the trending factor of 1.11 brings the value of the equipment up to current replacement cost new, which would be:

$$
\$ 10,000 \times 1.11=\$ 11,100
$$

Then we depreciate RCN assuming the property is seven years old with a suggested ten-year life and therefore has three years remaining in its useful economic life:
$\$ 11,100 \times .30=\$ 3,300$ is the same answer as above. (Rounded to nearest hundred.)
The valuation tables show percent good factors (.33) which are simply the products of the trending factors (1.11) and the straight-line depreciation factors (.30). These percent good factors are used to find current replacement cost new less depreciation. It is very important to remember that in using the trending schedules, you do not apply the trend factor a second time as it has already been used in the calculation of the percent good factor.

DATA PROCESSING EQUIPMENT 27 U

5
This category is for non-production computers. It includes personal computers, taxable software, smartboards, midrange and mainframe computers, and their peripherals used for data processing. Includes standard IBM compatible personal computers used in manufacturing and point of sale (POS) systems, but not proprietary POS units, such as computers built specifically to be used as POS computers or other proprietary computerized systems. For POS proprietary systems and electronic cash registers, see Store Equipment.

This category does not include computers embedded in machinery, nor does it include equipment or computers specifically designed for use in any other application directly related to manufacturing or retail. It does not include equipment that is an integral part of other capital equipment that is included in other classes of economic activity, such as computers used primarily for process or production control, switching, channeling, and automating distributive trades and services, such as proprietary POS computer systems.

This category does not include equipment of a kind used primarily for the amusement or entertainment of the user.

Note: Accelerated depreciation is used on data processing equipment. The residual is $5 \%$.
DRILLING EQUIPMENT (GAS, PETROLEUM \& WATER)

FABRICATED METAL PRODUCTS
Includes the manufacture of fabricated metal products such as cans, tin ware, hardware, metal structural products, architectural and ornamental metalwork, nuts, bolts, metal awnings, portable metal structures, etc.16
FARM AND RANCH MACHINERY AND EQUIPMENT .. ..... 16
A 10
Includes all farm implements, machinery and equipment used in the production of crops and animals, on the farm processing of feeds, poultry and swine house equipment, tractors, combines, and cotton harvesters.

Note: Whenever possible, this equipment should be appraised using the market (sales comparison) approach. There are several good pricing guides available which provide market values of farm equipment based on sales. If the county appraises farm equipment using the cost approach, the A-10 schedule with a $25 \%$ residual is statutorily required for all equipment in this category! See G.S. 105-317.1(b1).

FIBER OPTICS MANUFACTURING 20

Televisions ..... 17
B ..... 5
LANDSCAPING EQUIPMENT ..... 16

## IDLE EQUIPMENT

Equipment that has been taken off production status on a permanent basis is considered to be idle equipment. This classification should not be confused with equipment that is temporarily idle due to not yet being placed into production (CIP), a downturn in the economy, seasonal production, routine maintenance, etc. Although we recommend in most cases that some additional depreciation adjustment be made to verified idle equipment, there is no firm guideline as to what adjustment should be made to determine the final value.

In determining the amount of adjustment, the county appraiser must review each situation, taking into account all the factors affecting the property such as age, condition, past and future uses, marketability, remaining life, and reasons for the equipment being idle.

```
INSTRUMENTS (PROFESSIONAL, SCIENTIFIC & 
CONTROLLING, PHOTOGRAPHIC AND OPTICAL,
WATCHES AND CLOCKS). ................................................ }1
    Includes establishments in manufacturing scientific and
    research instruments such as meters - gas, liquid, tallying
