How to Fix "Excel File Can't Find Project or Library Error" Error

This guide walks you through the process of repairing an MS Excel document that displays an "excel can't find project or library" error.

Step 1: Navigate to the location on your computer you saved the MS Excel file producing an error message, and open it.

Step 2. Press the *ALT* and *F11* keys to open the Visual Basic Editor in a new window. Click on the *Tools* menu item, and click on *References*.

Step 3. The dialogue box will display "missing object library or type" as shown below.

 Visual Basic For MISSING: Micros 	Applications oft Excel 16.0 Object Library	<u>^</u>	Cancel
 OLE Automation Microsoft Office Microsoft Word 	1 16.0 Object Library 16.0 Object Library		Browse
VBAProject		+	
AccessibilityCpl	Admin 1.0 Type Library 3.0 Type Library	Priority	Help
AcroBrokerLib	Library	+	
ActiveMovie co	ntrol type library		
AdHocReportin	gExcelClientLib 7.0 Browser Control Type Libr	arv 1.0 *	

Uncheck the missing object library or type and click OK.

OLE OLE Micro Micro VBAF	Automation osoft Office osoft Word	16.0 Object Libra	arv			
VBA	Project		ry		+	Browse
Acro Acro Acro Acro Activ Activ	ssibilityCplA bat Access BrokerLib e DS Type I eMovie con occeporting	dmin 1.0 Type Li 3.0 Type Library Library trol type library ExcelClientLib	orary	F	Priority	Help
Adol	e Acrobat	7.0 Browser Cont	rol Type Library	v 1.0 T		

Final Step: Exit and save the original excel file. Now check to ensure respective functions are working properly.
