### Instructions (continued)

11. <u>Computation of Tax</u> - Determine the amount of tax by completing the Computation of Tax Schedule below. The amount of tax for each donee is based on the relationship of the donee to the donor. Use the applicable Tax Rate Schedule to compute the amount of tax for each donee and enter the amount in column 2 of the Computation of Tax Schedule. Example: John Smith is a Class A donee with total taxable gifts of \$38,000. To compute the total tax, use the Tax Rate Schedule for Class A donees, find the \$25,000 - \$50,000 line, and make the following computation: (\$38,000 - \$25,000 = \$13,000 x 3% = \$390 + \$400 = \$790 Total Tax)
