Detail may not add to totals due to rounding.

This table compares the basic corporate income tax rate(s) generally applicable for the states that levy a tax on corporate income, but does not attempt to address alternate taxable income

computational methods or exceptional provisions and circumstances specific to certain corporate entities. Additional business franchise taxes, alternative minimum taxes, and surcharges may apply.

Texas imposes a franchise tax (margin tax) imposed at 1.0% (0.5% for retail/wholesale entities) of gross revenues over \$300,000, with a variable discount allowed for businesses with revenues

between \$300,000 to \$900,000. Nevada, Washington, and Wyoming do not levy state corporate income taxes.

Per capita tax collection amounts are computations based on July 1, 2008 population estimates of the Bureau of the Census.

<sup>\*</sup>Includes general sales tax, use tax, gross income and gross receipts taxes, but excludes excise taxes levied on specific commodities and services.

<sup>\*\*</sup>Includes the following taxes as applicable: property, general sales and gross receipts, selective sales, licenses, individual and corporation income taxes, death and gift, documentary and stock transfer, severance, and other taxes.

Data for some states include state-collected local sales tax. North Carolina sales tax data include \$17,397,117 retained by state to pay for the costs of collecting and distributing local sales taxes.

<sup>&</sup>lt;sup>a</sup>Weighted average computations based on tax collection totals and population for the 46 states levying a corporation income tax.
