NC-478G - Investing in Renewable Energy Property

The credit for investing in renewable energy property that serves a nonbusiness purpose is not taken in installments but is taken in the tax year the renewable energy property is placed in service. Any unused portion of either credit may be carried forward for five succeeding years. Important. #### Credit History Table

The purpose of the Credit History Table is to provide a means for taxpayers to track both the credit amount available for each tax year and the actual credit taken as an installment. By using the Credit History Table, taxpayers can verify that the amount of credit taken for each installment does not exceed the amount of credit actually available to the taxpayer. The table also provides a means for tracking any unused portion of an installment that can be carried to future years or has expired.

*(Note. The information requested for Part 5 is a cumulative total for all establishments and should be entered only once on the last NC-478G filed. The installment portion of Credit History Table can not be completed in its entirety until after completing Part 3 of NC-478.)*
